**REQUIREMENTS FOR IRRIGATION METER:**

- 1) A meter setting will be constructed at the property owner's expense in accordance with the existing plumbing codes of the City of Norwalk. Your plumber must be bonded and licensed by the City of Norwalk and possess the proper plumbing permits for this project. The fees associated with an irrigation meter installation include a \$35 plumbing permit, and either \$300 for a ¾" meter or \$350 for a 1" meter.
- 2) The purchase of the Sensus meter and MXU system is the responsibility of the property owner and shall be purchased from the City of Norwalk.
- 3) A plumbing inspection must be completed before the irrigation meter can be set by the Water Department. After the inspection is complete, arrangements need to be made to have the meter installed and the MXU connected. Contact the Norwalk Water Department at 981-0228 ext. 2231, between the hours of 8:00 A.M. and 4:30 P.M., Monday through Friday.

**SEQUENCE OF EVENTS:**

- 1) Taking out of required permit and paying the fees as shown above.
- 2) Hiring of a bonded and licensed plumber to construct the meter setting. The meter shall be connected so that water DOES NOT go through both meters (no deduct meters).
- 3) Inspection of the meter setting by the City of Norwalk plumbing inspector.
- 4) Set an appointment with the Norwalk Water Department to have the meter and MXU installed.
- 5) Meters will be read each month and billed accordingly.

The sewer rate will not be charged on the irrigation meter.
